Why PMSS3?

PMSS3 is designed to support Program Executive Office Enterprise Information Systems (PEO EIS) and related organizations in their varied missions and in command, control, and communications activities. The services are required by the PEO EIS headquarters, directorates, and project/product offices. The purpose of PMSS3 is to provide the full range of program management support services, including advisory and acquisition consulting services, Systems Engineering and Technical Assistance (SETA), and incidental IT services. The PMSS3 contract provides the requiring offices with the means to obtain staff augmentation support services for non-inherently governmental in nature tasks that exceed organic capabilities.

- Project/Product Management Support
- Business Process Reengineering (BPR) Support
- Information Systems Security Support
- Contingency Planning Support
- Physical Security Support
- Enterprise Design, Integration, and Consolidation Support
- Systems Operation and Maintenance Support

- Integrated Logistics Support
- Other Information Technology-Related Services and Support

A trusted partner

With LMI's team, you have quick access to a world-class set of respected, proven acquisition professionals and technical expertise. Our team brings proficiency in program management and major DoD systems acquisition. We offer independent, objective analysis free of commercial bias. We understand your mission, needs, and culture, and we bring quality services that meet your small business requirements.

LMI team strengths

- Covers all nine PMSS3 functional areas
- Proven past performance
- Independent and OCI free
- Strong relationships in the U.S. Army and DoD components
- Diverse small business team
- Can meet surge requirements on short notice
- Cost and price effective

The LMI team

LMI—A trusted partner of PEO EIS for the past 16 years, with an extensive track record of maintaining Army programs on time and within performance and cost guidelines. LMI is a consulting firm dedicated to improving the management of government. With more than 1,000 consultants, we design and implement solutions to some of the toughest problems facing government managers in logistics, information technology, and resource allocation. For 55 years, LMI has placed our clients' interests first.

Our team's highly knowledgeable subject matter experts for PMSS3 will apply deep corporate knowledge and lessons learned to enhance mission effectiveness. We help our clients become leaders in acquisition and implementation, including work with GCSS-Army and Army Enterprise Systems Integration Program (AESIP).

Large business team members

Addx—Through innovative thinking, carefully defined processes, and the efficient use of technology, Addx serves the U.S. government by meeting evolving mission demands with fewer resources. Addx is passionate about delivering the highest quality of program management services, technology solutions, intelligence capabilities, and cyber security services to the federal marketplace.

Battelle—The world's largest nonprofit research and development organization with over 22,000 employees at more than 60 locations globally, Battelle is a 501(c)(3) charitable trust that manages the world's leading national laboratories and maintains a contract research portfolio spanning consumer and industrial, energy and environment, health and pharmaceutical, cybersecurity, and national security.

Camber—A leading provider of Agile software engineering and IT solutions; modeling, simulation, and training solutions and services; and engineering and management services directly supporting critical programs within PEO Aviation, PEO IEWS, and PEO EIS. We also support the Army, Air Force, and Marine Corps along with numerous federal and commercial customers.

ICF—A leading global provider of professional services to government and commercial clients. ICF's experts help the Army, as well as other DoD clients, improve mission readiness, leadership, and program performance. ICF utilizes the latest tools, technologies, and best practices to meet client needs while delivering high quality, secure solutions.

MANCON—Provides logistics, technical, and administrative personnel support services to the federal government across the nation. We also provide supply chain management solutions to federal, state, and local governments.

Schafer—A provider of advanced scientific, engineering, and technical services and products, Schafer provides innovative expertise and technology management to the military, intelligence, Department of Homeland Security, National Aeronautics and Space Administration, commercial space, and other industries. Its focus guides complex, high-level missions and programs through acquisition support, technology development, modeling and simulation, communication, and directed energy.

Skyline—A well-established, nationally recognized company built on a foundation of integrity, dependability, dedication, and customer focus. Skyline specializes in providing critical program management, administrative, and professional support services to federal government agencies worldwide through numerous medical and service contracts and General Services Agency Consolidated Schedules IT-70, Mission Oriented Business Integrated Services (MOBIS), and Logistics Worldwide (LOGWORLD).

Small business team members

Connected Logistics—An SDVOSB strategically co-located with 13 PEO EIS and other Army clients at Ft. Belvoir, and in Korea, Kuwait, Hawaii, Ft. Huachuca, Ft. Gordon, and elsewhere. Capabilities include acquisition planning and support; BPI/BPR; cybersecurity/IA; ERP design, architecture, and integration; logistics automation systems; engineering; program management; and SETA support.

iNovate Solutions—A woman-owned, SBA 8(a) SDB, EDWOSB small business with extensive experience providing federal and commercial customers with solutions in program management support, systems integration, acquisition, and infrastructure management support. We have direct experience supporting the PEO EIS P2E, AESIP, and GCSS-Army programs in providing technical and management support services and are prepared to mobilize rapidly in providing value-based, business driven, optimized solutions and services.

Mahan—A minority-owned, VA CVE-certified SDVOSB management and technology consulting firm created to help federal and commercial organizations maximize their potential. We utilize proven processes and methodologies to assist agencies and companies in the realization and accomplishment of their program goals.

SAVA—Offers high quality, innovative solutions to support critical national security programs and operational requirements. SAVA's core competencies include service offerings in information technology, information security, and strategic consulting. SAVA successfully supports enterprise architecture and systems security for both the FBI and DEA.

Sigmatech, Inc.—30 years' experience, 300 employees, Huntsville based with presence in Colorado Springs, DC, and Aberdeen. Sigmatech is run by retired senior Army officers and executives and specializes in providing acquisition support services to the Huntsville market (Aviation, UAS, Space and Missile). Additionally, our other two main thrusts are foreign military sales as one of the largest providers for the Army and training/education.

T3 Tigertech—We love solving hard problems! Our clients know us as trusted, talented, and tireless partners; and they rely on us to deliver innovative, insightful solutions. We find the answers that no one else finds, because we see the problems that no one else sees. We are a SDVOSB under \$15M; we are certified veteran enterprise (CVE) by Veterans Affairs. We are ISO 9001:2008 Certified.

Valiant—A historically underutilized business zone (HUBZone) company that specializes in all areas of cybersecurity and cloud security management. We also have expertise in various other IT disciplines including DevOps, SecDevOps, and Agile Development. Valiant is consistently recognized as one of the best places to work and believes corporate culture is paramount to building and maintaining a successful, innovative company.

Zenetex—Established in 1999, Zenetex operates from its headquarters in Herndon, VA, with offices strategically located around the country to support a wide array of customers. We are a major services provider of program management, acquisition management, engineering, technical, training, communications/public relations, information technology, logistics, and FMS services.
