in Aircraft

Contract Number:
GS00Q14OADU718

OASIS overview

Services provided under OASIS meet the professional service mission requirements of all federal agencies, including all organizations within DoD and national security community. The scope of OASIS spans many areas of expertise and includes any and all components required to formulate a total solution to a professional services-based requirement. The six core functional disciplines of OASIS are

- program management,
- management consulting,
- scientific,
- engineering,
- logistics, and
- financial.

OASIS benefits

- Available to all federal agencies worldwide and provides support for commercial and non-commercial requirements, allowing for the use of various contract types to best meet customer requirements.
- Provides a streamlined, proven acquisition process.
- No program ceiling value, and the period of performance is a five-year base with one five-year option, providing long-term planning for complex program requirements.
- Innovative-tiered access fee, ranging from 0.10–0.75 percent.

A trusted partner

Created by government for government, LMI is a full-service not-for-profit consulting firm and trusted partner. We help you develop the right solutions:

- **Resource Management.** Transform client efficiency through organizational and human capital solutions, operations and financial management, energy and environment, infrastructure and engineering, and intelligence programs.
- **Operational Logistics.** Mobilize government clients and deployed military forces with joint logistics operations, logistics planning support, integration, sustainability, life-cycle management, and defense strategy and policy.
- **Materiel Management.** Guide clients through procurement, acquisition and product support, maintenance and readiness, supply chain management, supplier relationship management, spares optimization, forecasting, and modeling.
- **Health Management.** Build stronger communities across the nation and around the world through health insurance policy and analysis, systems management, supply chain management, health facilities management, and data analytics.
- **Technology Services.** Modernize client information technology through system integration, information assurance, life-cycle software development, big data analysis, semantic technology, cloud migration, and cybersecurity.

Impactful results

Below are meaningful examples of our work and client support:

- **Ensuring military readiness.** Supporting the Marine Air Ground Task Force and Air Force Special Operations with the V-22 Osprey, LMI uses cutting-edge analytical tools to calculate full-spectrum fleet readiness.
- **Supporting grants management.** Managing the full spectrum of application review and awards for the CMS, LMI developed requirements, custom tools, reporting, and user and reviewer training.
- **Innovating workforce transformation.** From the Department of State to the U.S. Army, LMI's powerful analytic tool, OrgIQ, provides managers with deep insights into organizational overlap, redundancy, attrition risk, and more.
- **Transforming financial management and logistics.** Implementing enterprise resource planning (ERP), LMI enables the Army to examine the true cost of any piece of materiel and meet system standards (Program Executive Office, Enterprise Information Systems, PEO EIS).
- **Implementing defense materiel standards.** We apply defense materiel best practices and ERP tools for Sweden's Defence Materiel Administration, including a service-oriented architecture, IT acquisition, system requirements definition, and legacy system transition.
- **Improving global health supply chains.** We improve healthcare supply chain operations through cost analysis, financial management, and capacity building, working with USAID, GAVI, World Bank, and the Bill & Melinda Gates Foundation in Kenya, Uganda, Angola, Bangladesh, and Pakistan.
- **Modernizing financial systems.** Supporting 200 Army financial centers around the world, LMI has deep Department of Defense expertise in financial management systems, acquisition, and federal requirements, including providing project cost and schedule management and program management support
